Summary

X gantry I recreated. Holes are perfectly aligned, I then used this to design shrouds

X gantry model I recreated of the Ender 3/pro/3v2/CR10 (v1)
Holes are perfectly aligned, I then used this to design shrouds (like the MarsOrbiter, SaturnOrbiter and ApolloLander, of which I never received any complaints regarding mounting hole alignments)
Ender3v2 middle top hole is not threaded, same for the lower right hole.
all other small mounting holes are m3 threaded.
